Introduction

Using an import file allows you to create multiple shipments quickly and reduces the risk of data errors

This guide covers the setup process, data configuration and the printing options available in MyDPD.

Workflow

Creating an Import File

MyDPD has the ability to import a file containing multiple lines of shipment data, but it must be in line with our specification.

File Format

MyDPD can accept **.csv** or **.txt** file formats with a delimiter of **Comma (,) Pipe (|) Colon (:) Semi-colon (;) Tilde (~)** or **Tab** to separate the shipment data fields.

MyDPD will attempt to import any files that have the defined extension (i.e .csv) that you have saved in your import directory folder. Any filename can be used for the import file import file.

For domestic shipping, each line of data represents a new shipment. This means you can include a single, or multiple shipments in a single import file.

International shipping requires the shipment delivery information, along with electronic customs invoice data. See Pages 18 - 20 for more details.

Mandatory Fields

MyDPD can capture a variety of information about the shipment being sent. Below is a table of the key fields available within MyDPD.

The mandatory fields for domestic shipping are highlighted in green. The mandatory fields for international shipping are highlighted in orange.

Shipment Data				
Field Type	Domestic Mandatory	International Mandatory	Max Field Length	Example Data
Delivery organisation/name		Y	35	Natural History Museum
Delivery address line 1 (property/street)	Y	Y	35	Cromwell Road
Delivery address line 2 (locality)			35	South Kensington
Delivery address line 3 (city)	Y	Y	35	London
Delivery address line 4 (county/state)			35	Greater London
Delivery postcode	Y	Y	7	SW7 5BD
Delivery country code		Y	2	GB
Delivery additional information			50	Deliver to side entrance
Delivery contact name		Y	25	Joe Smith
Delivery contact telephone number		Y	15	012127695100
Delivery customer ref. 1			25	ORD-0123456
Delivery customer ref. 2			25	ORD-0123456
Delivery customer ref. 3			25	ORD0123456
Delivery customs value (GBP)		Y	10	100 The total value of the items within the parcel to be displayed on the invoice (not including shipping costs) & values provided must be exclusive of VAT. Zero '0' values must not be used else parcels will be returned to the sender. For items of no commercial value please enter the intrinsic or cost value for customs assessment purposes.

Delivery description		Y	25	Women's Cotton Dress A detailed description of the overall contents of the parcel is required. To prevent customs delays or the parcel being returned avoid generalised or vague descriptions e.g. instead of 'clothing' state 'women's cotton dresses' or instead of 'tools' state 'hand tools' or electric tools' Must be provided for all non UK destinations including Northern Ireland, ROI and Channel Islands.
Delivery no of packages		Y	2	1
Delivery notification email address		See Notes	50	Mandatory information needed to contact the Importer where duties/tax are payable before Delivery (email or SMS number). We only accept + and () in the telephone number.
Delivery notification SMS number		See Notes	15	
Delivery service code			4	As per service code list (See Page 21 - 24 for full list of Service Codes)
Delivery total weight (kg)		Y	5	21
Extended liability flag (Y/N)			1	Y/N
Extended Liability Value		To be populated if liability flag is Y above	10	100

Invoice Details - Required for International Shipments (Shipments to the Channel Islands still require paper invoices)				
Field Type	Domestic Mandatory	International Mandatory	Max Field Length	Example Data
Generate Customs Data (Y/N)		Y	1	Y/N - Should be Y to generate Electronic Customs Data for International shipments
Invoice Type		Y	10	1 = Proforma 2 = Commercial
Invoice Reference			30	Invoice Reference 1
Exporter address line 1 (property/street)		Y - See notes	35	Exporter details required if Invoice defaults not completed or different from those set in MyDPD>My Account Settings>Invoice Settings.
Exporter address line 3 (city)		Y - See notes	35	
Exporter postcode		Y - See notes	2	
Exporter country code		Y - See notes	2	

Exporter address line 2 (locality)		Y - See notes	35	
Exporter address line 4 (county/state)		Y - See notes	35	
Exporter contact name		Y - See notes	35	
Exporter contact telephone number		Y - See notes	20	
Exporter organisation/name		Y - See notes	35	
Exporter Destination Tax ID / IOSS Registration Number		See Notes	45	123456789 - Currently required for low value shipments to Australia. Customers with revenue in Australia of over 75000 AUD are required to register for Australian GST and take tax at checkout for goods valued below 1000 AUD. The IOSS registration number should be supplied for applicable distance sales (under 150 Euros) to the EU where registration into the Import One Stop Shop has been adopted by the retailer/sender and the necessary VAT obligations have been complied with. If IOSS is not used for distance sales goods to the EU under 150 Euros, country availability is limited on DPD Classic. Please contact your account manager for further info. This can be added as default in My Account Details > Invoice Settings
GST/VAT Paid		See Notes	1	Y/N - Currently required for low value shipments to Australia
Exporter EORI No.		Y	45	Must be GB + 12 digits, e.g. GB123456789012. This can be added as a default in My Account Details > Invoice Settings We cannot accept EU EORIs, this field must always be an EORI with a GB prefix of a GB registered entity. This has to be in the format of GB and 12 numeric digits. If incorrect parcels will be returned
Exporter VAT No			11	The format of a VAT is GB and 9 digits. This can be added as a default in My Account Details > Invoice Settings We cannot accept EU VAT numbers, this field must always be a VAT with a GB prefix of a GB registered entity. If incorrect parcels will be returned
FDA Registration No.			45	Only required for shipments to USA. This is only required when providing a registration number for Food and Drugs shipped to USA.

Shipping/Freight Cost (GBP)			6.2	To be populated with customer cost to send shipments. If no value provided this should be left blank and DPD UK will assume this is included in the overall consignment value
International Billing Terms (Terms of Delivery)		Y- If alternative Terms of Delivery are setup on account	DAP or DT1	DAP - This is for duties and taxes unpaid parcels where the Importer is to pay those charges. DPD will contact the recipient to pay these. DT1 - This is for duties and taxes prepaid. This option is by arrangement only and requires additional set-up. For this option, DPD will invoice the Exporter any duties and charges levied upon importation. Contact your account manager for more information.
Reason for Export		Y	45	01=Sale 02=Return/Replacement (applicable for Air services only) 03=Gift If populated with anything other than 01,02,03 we will default to 01
Importer address line 1 (property/street)		Y - See notes	35	Importer details required if different from the delivery address. If no Importer details supplied the delivery address will be used. Populating a different Importer is only available to certain destination countries, speak to your account manager for further information.
Importer address line 3 (city)		Y - See notes	35	
Importer postcode		Y - See notes	8	
Importer country code		Y - See notes	2	
Importer contact name		Y - See notes	35	
Importer organisation/name		Y - See notes	35	
Importer address line 2 (locality)		Y - See notes	35	
Importer address line 4 (county/state)		Y - See notes	35	
Importer EORI No		Y - See notes	16	Mandatory if the recipient address is a business address. The format of an EU EORI is the country code of the issuing Member State, followed by a code or number that is unique in the Member State. Please note for goods to the EU under 150 Euros country availability is limited on DPD Classic.
Importer Vat No			16	Mandatory if the recipient address is a business address. Please note for goods to the EU under 150 Euros country availability is limited on DPD Classic.
Importer PID			16	B2C only. Consumer's national ID number. This is required for Customs Clearance.

Importer contact telephone number		Y - See notes	20	Mandatory information needed to contact the Importer where duties/tax are payable before delivery (email or phone number) - We only accept + and () for telephone
Importer contact email		Y - See notes	50	

Product Details - Required for International Each Product detail needs to be on a separate line and start with PRD				
Field Type	International Mandatory	Max Field Length	Notes	Example
Identifier	Y	3	Each product line starts with PRD	PRD
Product Code		255		258675267
Fabric content		200		Woven 100% Silk
Harmonised code	Y	8	Most appropriate HTS code for product.	6204430000
Unit weight (kg)	Y	4.2	Unit weight must not exceed the total shipment weight	2.6
Product URL		255	Required for Russia shipments only	
Parcel	Y	2	Defines which parcel in the Job contains this item	1
Description	Y	200	An in-depth description of the product	Warehouse Embroidered Floral Silk Tunic
Product type		40	A brief description of what type of product the item is. (This needs to be in English)	Womens Dresses Day
Item origin	Y	2	ISO-2 country code	IN
Quantity	Y	5	The quantity of that particular product in the parcel	1
Unit value (GBP)	Y	7.2	The value of that particular product	44.00

DPD Direct Product Details Each Product detail needs to be on a separate line and start with PRD				
Field Type	DPD Direct Mandatory	Max Field Length	Notes	Example
Identifier	Y	3	Each product line starts with PRD	PRD
Product Code	Y	255		258675267
Fabric content	Y	200		Woven 100% Silk
Harmonised code	Y	8	Most appropriate HTS code for product	6204430000
Unit weight (kg)	Y	4.2		2.6
Product URL		255	Required for Russia shipments only	
Parcel		2	Defines which parcel in the Job contains this item	1

Description	Y	200	An in-depth description of the product	Warehouse Embroidered Floral Silk Tunic
Product type	Y	40	A brief description of what type of product the item is. (This needs to be in English)	Womens Dresses Day
Item origin	Y	2	ISO-2 country code	IN
Quantity	Y	5	The quantity of that particular product in the parcel	1
Unit value (GBP)	Y	7.2	The value of that particular product	44.00

Notes:

Delivery = Delivery Details

Importer = Delivery Invoice Details

Exporter = Senders Invoice Details

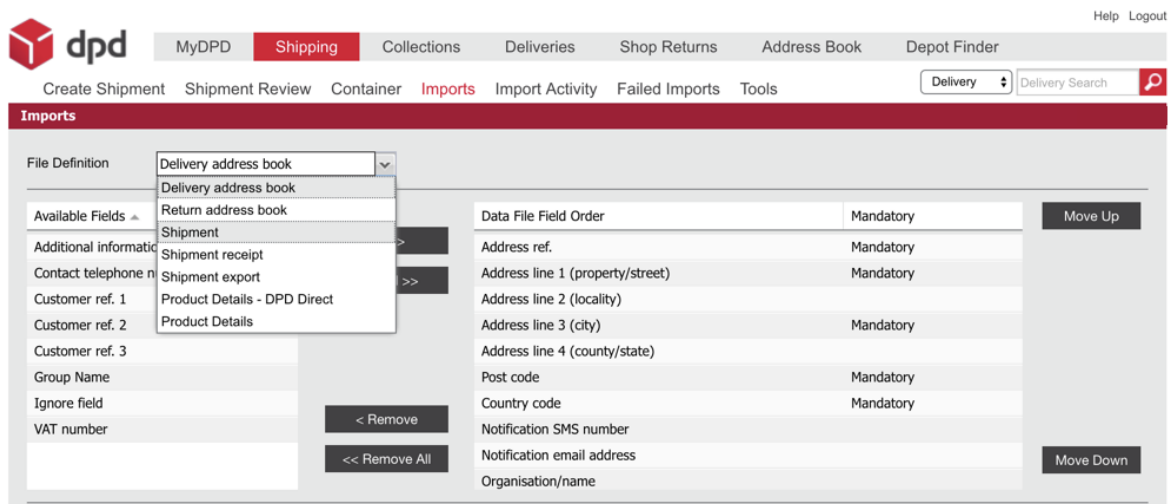

Mapping an Import File

Once the import file has been created, MyDPD needs to know the order of the information in the file and how it is presented. We refer to this as mapping the import file.

To map the file login to MyDPD and navigate to **Shipping > Imports**

Click on the **File Definition** drop down menu and select **Shipment**

Two lists will then be displayed. The list on the left is the **Available Fields** and the list on the right is the **Data File Field Order** list.

The Data File field Order is where the order of the information in the import file is defined.

The field at the top of the Data File Field Order list will be the data provided in the first field in the import file. The second field listed in the Data File Field Order list will be the second field in the import file.

To add fields to the Data File Field Order list you can click and drag them from the Available Fields list and place them in the Data File Field Order, or you can use the Add and Remove buttons on screen.

You can add as many fields as required, but it is key every field in your import file is mapped in the Data File Field Order list.

The number of fields listed in the Data File Field Order list must match the number of fields present in the file.

Example Mapping

Field Position	Mandatory	Data File Field Order	Import File Data
1	Y	Delivery Address Line 1	Cromwell Road
2		Delivery Address Line 2	South Kensington
3	Y	Delivery Address Line 3	London
4		Delivery Address Line 4	
5	Y	Delivery Postcode	SW7 5BD
6		Delivery Customer Ref 1	Order192837
7		Ignore	Order from website
8		Delivery Notification SMS	07123456789
9		Ignore	

The table above shows an example import file. The Import File Data column represents the data in the import file. The Data File Field Order column shows the fields that would be used in the import mapping.

The number of fields in the import file match the number of fields mapped in the Data File Field Order list. This is helped by using the Ignore field in the Data File Field Order list.

The Ignore field allows the user to tell MyDPD that a field is present, but the data is irrelevant or the field is blank (See Field Positions 7 and 9).

The data import file in this example would appear as follows:

Cromwell Road, South Kensington, London,, SW7 5BD, Order192837, Order from website, 07123456789,

Please note the data in the example only goes on to a second line in this document due to the size constraint of the page.

Import Settings

Beneath the file import mapping lists, there is a series of options relating to the import file and printing process:

Import Directory: C:\Import

Import Extension: .CSV

Field Delimiter: Comma (,)

Product Field Delimiter: Pipe (|)

Print Label on Import: ☒

Select Printing Sequence: Import order (default)

Disable Bad Labels: ☐

Auto Import: ☒

Header Lines: 1

Footer Lines: 0

Weight = 0 set to: ☒

Buttons: Import, Export, Cancel, Save

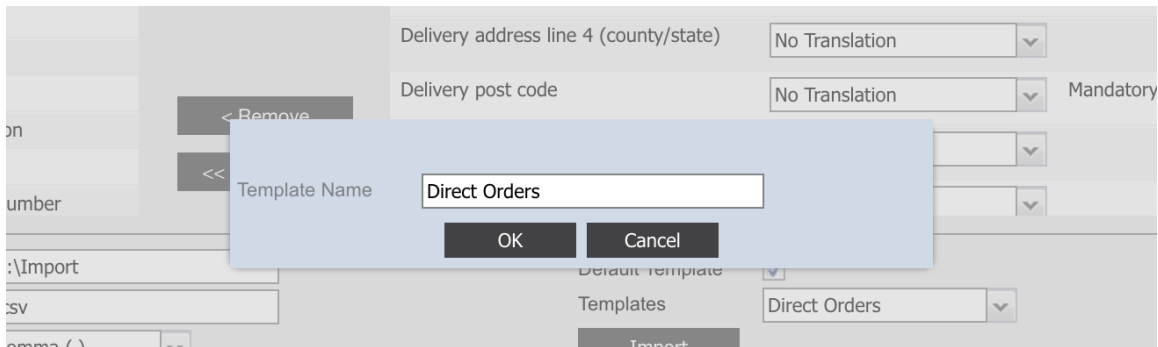

ALL ORDERS AND CONTRACTS FOR THE SUPPLY BY DPD OF CARRIER SERVICES SHALL BE GOVERNED BY ITS STANDARD [TERMS & CONDITIONS](#) OF TRADING.
 DPD is a trading division of DPDgroup Limited. Registered office: PO Box 6979, Roebuck Lane, Smethwick, West Midlands, B66 1BN. Registered in England and Wales No 732993

Setting	Explanation	Example
Import Directory	The folder location on the computer where MyDPD imports the shipment data file from	C:\import
Import Extension	The file type of the the shipment data file	.csv
Field Delimiter	The character that separates the data in the shipment data file	Comma (,)
Product Field Delimiter	The character that separates the data in certain international shipments in the shipment data file	Pipe ()
Print Label on Import	The label automatically printed as soon as the shipment data is imported	Checkbox
Select Printing Sequence	Defines if the print order is the import sequence or by the data in Reference 1 (Only displayed if Print Label on Import is enabled)	Import order (default)
Disable Bad Labels	Stops MyDPD printing a label telling the user there was an error in the shipment data file	Checkbox
Auto Import	Automatically imports the shipment data file from the import directory	Checkbox

Header Lines	Defines how many lines of data MyDPD should ignore at the start of the shipment data file	1
Footer Lines	Defines how many lines of data MyDPD should ignore at the end of the shipment data file	0
Weight = 0 set to	Defines the weight of shipments that have a weight of '0' in the shipment data file	4

Once the setup process has been completed, click on **Save** at the bottom corner of the screen.

A pop-up window will appear requesting you name the mapping template. This is because you can store multiple mapping templates within MyDPD.

If you use the same template name, it will overwrite the previous saved template. If a different template name is used, a second template will be saved.

If multiple templates are saved, please ensure the default template is ticked.

A screenshot of the MyDPD configuration screen. On the left, there are several input fields: 'Import Directory' (C:\Import), 'Import Extension' (.csv), 'Field Delimiter' (Comma (,)), 'Product Field Delimiter' (Pipe (|)), 'Print Label on Import' (checked), 'Select Printing Sequence' (Import order (defa)), 'Disable Bad Labels' (unchecked), 'Auto Import' (checked), 'Header Lines' (1), 'Footer Lines' (0), and 'Weight = 0 set to' (checked). On the right, there is a 'Default Template' section with a checked checkbox and a 'Templates' dropdown menu showing 'Direct Orders'. Below these are 'Import' and 'Export' buttons. At the bottom right, there are 'Delete', 'Cancel', and 'Save' buttons.

ALL ORDERS AND CONTRACTS FOR THE SUPPLY BY DPD OF CARRIER SERVICES SHALL BE GOVERNED BY ITS STANDARD [TERMS & CONDITIONS](#) OF TRADING.
DPD is a trading division of DPDgroup Limited. Registered office: PO Box 6979, Roebuck Lane, Smethwick, West Midlands, B66 1BN. Registered in England and Wales No 732993

Printing a Label

Once a shipment has been created in MyDPD there are multiple ways of printing the final label.

MyDPD can accommodate a variety of workflows depending on your needs.

Automatic Printing

MyDPD can print the shipping labels as soon as an import file has been imported.

To enable this, tick the **Print Label on Import** box in the **Import** settings screen.

DPD is a trading division of DPDgroup Limited. Registered office: PO Box 6979, Roebuck Lane, Smethwick, West Midlands, B66 1BN. Registered in England and Wales No 732993

With Print Label on Import enabled, all the valid shipments will be automatically printed from the import file.

The print order of the labels is defined by the Select Printing Sequence dropdown menu. The labels can be printed in the order in which they were imported by using the Import Order option, or alternatively a reference field can be used to define the label print sequence.

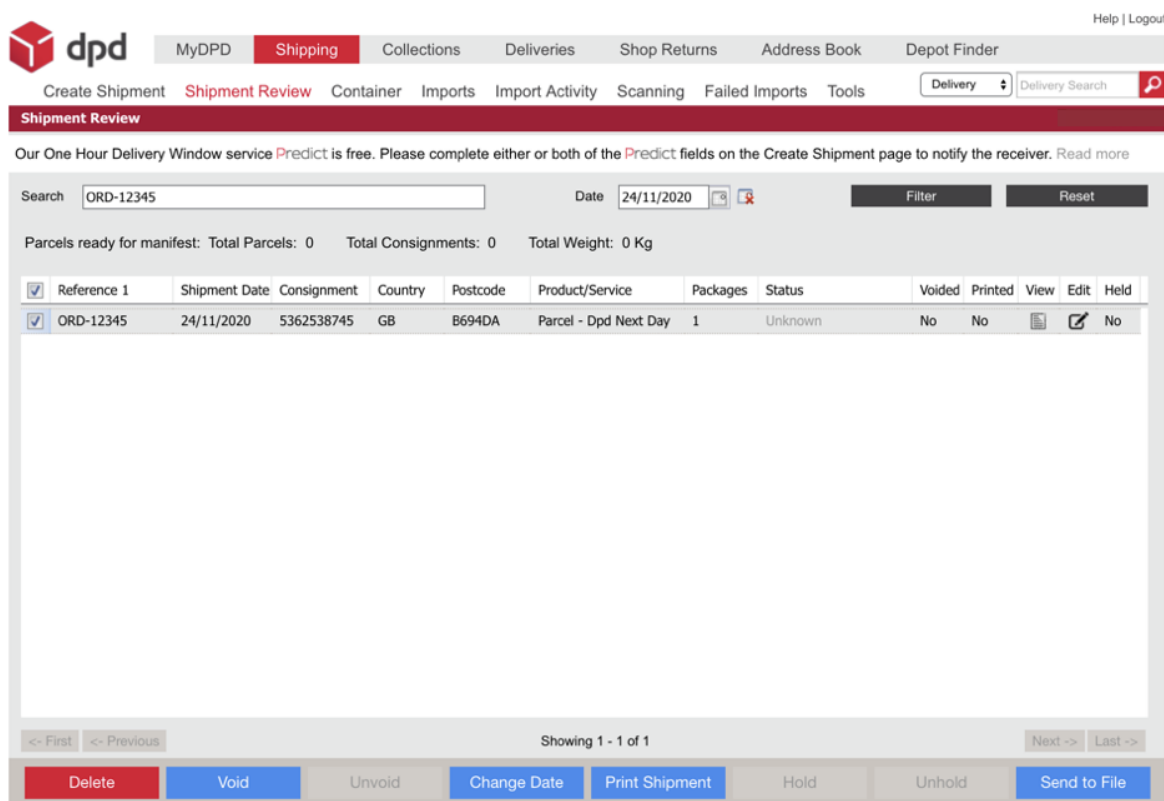

Search and Print

MyDPD can create a shipment using an import file, but it can be instructed not to print the label straight away.

This allows the user to print labels for a specific shipment when they are required.

Print Label on Import must be disabled within the **Import settings**. This allows the user to import a file, without producing a label automatically.

Shipments can be searched for using almost any shipment data within Shipment Review. Once the relevant shipment has been found, tick the checkbox to the left of the relevant shipment and click on Print Shipment at the bottom of the screen.

The screenshot shows the MyDPD web interface. The top navigation bar includes links for MyDPD, Shipping (active), Collections, Deliveries, Shop Returns, Address Book, and Depot Finder. Below this is a secondary navigation bar with links for Create Shipment, Shipment Review (active), Container, Imports, Import Activity, Scanning, Failed Imports, and Tools. A search bar on the right contains the text 'Delivery' and a magnifying glass icon. The main content area is titled 'Shipment Review' and contains a message about the One Hour Delivery Window service. Below this is a search section with a text input field containing 'ORD-12345', a date field set to '24/11/2020', and buttons for 'Filter' and 'Reset'. A summary line shows 'Parcels ready for manifest: Total Parcels: 0', 'Total Consignments: 0', and 'Total Weight: 0 Kg'. A table lists the search results with columns: Reference 1, Shipment Date, Consignment, Country, Postcode, Product/Service, Packages, Status, Voided, Printed, View, Edit, and Held. One result is shown for 'ORD-12345' with a status of 'Unknown'. At the bottom, there are navigation buttons ('<- First', '<- Previous', 'Next ->', 'Last ->') and a row of action buttons: Delete, Void, Unvoid, Change Date, Print Shipment, Hold, Unhold, and Send to File.

Reference 1	Shipment Date	Consignment	Country	Postcode	Product/Service	Packages	Status	Voided	Printed	View	Edit	Held

ALL ORDERS AND CONTRACTS FOR THE SUPPLY BY DPD OF CARRIER SERVICES SHALL BE GOVERNED BY ITS STANDARD [TERMS & CONDITIONS](#) OF TRADING.
DPD is a trading division of DPDgroup. Registered office: PO Box 6979, Roebuck Lane, Smethwick, West Midlands, B66 1BN. Registered in England and Wales No 732993

Scanning Screen

The Scanning screen isn't enabled by default on all logins. To enable the Scanning screen, please contact the account holders commercial contact within DPDgroup.

The **Scanning** screen allows the user to search for unprinted shipments using the data held in the **Reference 1** field. Every shipment must have a unique value in Reference 1.

The Scanning screen is designed for use with barcode scanners to input the Reference 1 data, but a user can also type in the information if preferred.

ALL ORDERS AND CONTRACTS FOR THE SUPPLY BY DPD OF CARRIER SERVICES SHALL BE GOVERNED BY ITS STANDARD [TERMS & CONDITIONS](#) OF TRADING.
DPD is a trading division of DPDgroup. Registered office: PO Box 6979, Roebuck Lane, Smethwick, West Midlands, B66 1BN. Registered in England and Wales No 732993

International Shipments

An International shipment must include the Delivery Information and extra data required for customs.

The Delivery Information and Electronic Customs Data will be presented on a single line in the import file. This is referred to as the Shipment Data in the examples on the following pages.

Product Data is also required to complete the Electronic Customs Data. Product Data must be included for every item that is being sent and presented on separate lines.

The import file must contain one line of Shipment Data and as many separate lines of Product Data as required.

Every line of Product Data must be preceded with a field containing 'PRD'.

The Shipment Data and Product cannot use the same field delimiter.

The full list of mandatory fields for the Shipment Data and the Product Data can be found on Pages 6 - 9.

IOSS (Import One-Stop Shop)

From the 1st July 2021, all commercial goods imported into the EU will be subject to VAT irrespective of their value. IOSS allows shippers that sell imported goods in the EU to collect, declare and pay the VAT to tax authorities instead of making the buyer pay.

IOSS was created to facilitate and simplify the declaration and payment of VAT. This is only applicable to purchases made by a buyer within the EU for goods values at 150 Euros or less.

The IOSS registration number can be added as a field to the import routine as listed below.

Northern Ireland Shipping

From 1st October 2021, it will be mandatory to supply Customs data for certain movement types shipped to Northern Ireland. In order for DPD to correctly identify movements where goods are applicable, we will require Customs data for all parcels to Northern Ireland. This

must be present in order for parcels to move through the network, clear customs and reach the end recipient successfully. You will find further details of the data required under the Manifest Data Files section.

Typically Northern Ireland Postcodes range from BT1 - BT99.
